INTERNATIONAL VERSION
Saturn is a drum that won’t rest on its laurels. Its look, its tone, and its robust construction have made it the only touring & recording choice for a community of professional drummers around the globe. With the addition of the SONIClear™ Bearing Edge and the SONIClear™ Tom Holder, Saturn V has been enhanced to offer easier tuning and a fuller, rounder tone with a deeper, darker pitch.

Saturn V arrives with new features that’ll enhance an already killer sound. Do you like fat and dense floor toms? How about clear and focused rack toms? Anybody for bass drums that kick you in the chest? Well come on in! We’ve got something to show you...
The SONIClear™ Bearing Edge is standard on all Saturn V shells and allows the drumhead to sit flatter and make better contact with the shell. The result is a stronger and deeper fundamental pitch, effortless and consistent tuning, and a significantly expanded tuning range. For the serious player, the increased head-to-edge contact increases shell vibration, allowing the sonic nuances of the Hybrid shell to stand out.

SONIClear™ Bearing Edge

SOUND
The increased drumhead-to-shell contact achieved by the SONIClear™ Edge enhances shell vibration, resulting in the biggest sound possible from the drum.

Oscilloscope Example: The Green Waveform is a recording of a drum with the SONIClear™ Edge. The dark grey waveform is a drum with a typical edge. Tuned to the same pitch and recorded identically, it’s clear that the drum with the SONIClear™ Edge produces a much larger waveform from the initial strike through the full sustain of the note.

SUSTAIN
Because the drumhead sits flat on the SONIClear™ Edge, the tension applied during tuning is more balanced and stress-free. This allows the drumhead to vibrate freely and fully.

Waveform Comparison Example: The Green Waveform is a recording of a drum with the SONIClear™ Edge. The dark grey waveform is a drum with a typical edge. The size of the SONIClear™ waveform indicates a lower and stronger fundamental pitch while the length indicates a longer sustain compared to a typical edge.

SONIClear™ vs Typical Edge

Oscilloscope Comparison Example: The Green Waveform is a recording of a drum with the SONIClear™ Edge. The dark grey waveform is a drum with a typical edge. Tuned to the same pitch and recorded identically, it’s clear that the drum with the SONIClear™ Edge produces a much larger waveform from the initial strike through the full sustain of the note.

The size of the SONIClear™ waveform indicates a lower and stronger fundamental pitch while the length indicates a longer sustain compared to a typical edge.
The low-mass bridge preserves vibration in the head and shell, enhancing resonance and increasing tonal clarity.

An Omni-ball arm adjustment allows toms to be positioned at any angle and inverted for convenient bottom head tuning.

The spring-hinged adjustable clamp with position markings accommodates tube diameters from ⅝" to 1¼" and makes setup easy and consistent.

The SONIClear™ Tom Holder is the standard attachment mechanism for all Saturn V rack toms. The low-mass bridge preserves vibration in the head and shell, enhancing resonance and increasing tonal clarity.

**Low-Contact Claws**

Tired of your bass drum claws looking like everyone else’s? Try these.

Increase resonance by reducing weight and contact on the counterhoop. Rubber gaskets protect the hoop finish and prevent the claw from rattling during play.

**SONIClear® Tom Suspension**

Hate it when you see more of the mount than you do of the shell? Us too.

Increases overall resonance by preserving vibration in the shell and heads. Doesn’t touch the tension rods, helping heads stay in tune and making them easy to change.

**Memory-Mark Bass Drum Spurs**

Ever use a ruler to make them even? Then this is for you.

Markings on the spur rods help players recall their settings and ensure level set-up. Circular treads on a rounded rubber foot prevent the drum from sliding during play.

**Free-Floating Bass Drum Mount**

The sound of a virgin bass drum or the convenience of a mount. Why not both?

Mount floats on suspended rails to maintain a virgin shell sound. Sliding mount bracket helps players find their ideal rack tom distance.

*a sold separately*
The Saturn V Series offers a variety of configurations designed to fit diverse musical applications. Whether the preference is fast and focused or big and booming, every drummer can find a setup to suit their style.

CONFIGURATIONS
How many ↑ and how many ↓?
Like the MH Edition, the MH Exotic shells use our unique hybrid of Maple and Walnut plies... However, that's where the comparison ends. The Exotics all come standard with SONIClear™ bearing edges & tom holders, black chrome hardware and are available in five distinct burl finishes. You’ll have a hard time deciding whether to play them... or just stare at them.
Satin Black Maple Burl

This matte finish is anything but flat. The figured burl veneer shows clearly through the transparent satin black stain, giving this finish amazing depth and dimension. This kit won’t be lost in the shadows.
Deep Water Maple Burl

The deep blue burst over the maple burl veneer creates the sensation of the chasm opening up before your eyes, inviting you to dive into and explore its depths. Still waters run deep.

Cherry Mist Maple Burl

A vivid, red transparent lacquer brings the unique figuring of the maple burl underneath it to life. Go ahead and let yourself be seduced by its charm and elegance; after all, we’re all slaves to our passions.
This finish is all about opulence. A luxuriant golden stain accentuates the detail of the exotic veneer, showing off everything there is to show. If you’ve got it, flaunt it.

Amber Maple Burl

The distinctive burl patterns are highlighted by a high-gloss clear lacquer, allowing the natural beauty of the wood to be the star of its own show. Simplicity is indeed the ultimate sophistication.

Natural Maple Burl
The MH Edition includes a mix of transparent lacquer, sparkle lacquer, and wrap finishes that span from traditional to progressive. Make no mistake... Saturn is still all about the Maple and Walnut hybrid sound. But let’s face it... Looks matter.
Marine Spiral

With shimmering diagonal streaks of blue and gold over a black base, the Marine Spiral wrap finish is intense and hypnotic. Be careful not to stare too long.
Red Strata Pearl

The red and black pearl wrap finish is a chameleon, looking bold and aggressive or refined and classy depending on the style in which it’s played. So which personality will you bring out of it?

Red/Blue Hybrid Sparkle

This lacquered sparkle finish blends fine blue and red flakes that each catch the light at different angles, giving this kit an iridescent quality. Is it red or blue... or purple? You decide.

Featured Set-up: Rock Shell Pack – [24 - 14]
**Transparent Espresso Walnut**

With its transparent espresso stain and high-gloss lacquer, this finish will be a centerpiece in any room. You can use it as furniture when you’re not playing. Just keep your feet off of it.

---

**Granite Sparkle**

The black and silver flakes and high-gloss lacquer combine to produce a unique granite sparkle that will catch the light and glitter like quartz. Breaking up all those rocks wasn't easy... but it was worth it.
In the studio. On tour. In the woodshed. Falcon’s convenience and simplicity keep your mind where it needs to be... ON PLAYING!

**Snare Stand**
- Reduced Base Plate Size
- Interchangeable Drives
- Footboard Height Adjustment
- Self-Adjusting Hoop Clamp

**Bass Pedal**
- Interchangeable Beater Weights
- Beater Angle Adjustment
- Interchangeable Drives
- Footboard Height Adjustment
- Reduced Base Plate Size

**Hi-Hat Stand**
- Centered Omni-Ball Snare Basket Adjustment
- Base Height Adjustment
- High Friction Rubber Feet with Retractable Spikes

**Boom Stand**
- Lockable Quick-Release Wingnut
- Single-Point Boom Arm Adjuster with Position Markers
- Super Glide Stepless Tilter
- Hide-Away Boom Arm
- Foldable Footboard
- Removable Swivel Legs
- Tension Adjuster
